

Encoding Mixtepec-Mixtec Etymology in TEI

Jack Bowers, Laurent Romary

► **To cite this version:**

Jack Bowers, Laurent Romary. Encoding Mixtepec-Mixtec Etymology in TEI. TEI Conference and Members' Meeting, Sep 2018, Tokyo, Japan. hal-02003975

HAL Id: hal-02003975

<https://hal.inria.fr/hal-02003975>

Submitted on 1 Feb 2019

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Encoding Mixtepec-Mixtec Etymology in TEI

Jack Bowers

jack.bowers@oeaw.ac.at

Mixtepec-Mixtec

- Sa'an Savi “rain language”
- ISO 639-3 code: ‘mix’
- San Juan de Mixtepec - Juxtlahuaca district (Oaxaca, MEX)
- “Vigorous” status but highly under-resourced
- Oto-Manguean, Mixtecan, Mixtec-Cuicatec, Mixtepec-Mixtec
- Tonal
- Spoken data mostly collected in sessions working with speakers from a small village called Yucunani in the San Juan Mixtepec municipality
- Estimated (+-9,000 -10,000 speakers)
Source: (INEGI, 2010)
- Phonology has been studied by Pike and Ibach (1978); Paster and Beam de Azcona (2004-2007);
- Beckman and Nieves-SIL (2005-current) published booklets and are working on developing orthography

Introduction to Project

- Language documentation: (*PhD project*)
- Primary sources of language data:
 - speaker consultations (recordings, new written material..)
 - +- 40 Children's Booklets (SIL)
 - Public sources (You Tube, *other*)
 - examples from academic papers
- Goals:
 - TEI Corpus
 - Linguistic descriptions
 - TEI Dictionary (*actually 2 dictionaries, 1 general, 1 inflectional*)
 - (*Etymology*) would like to create data contents and structure that can be copied and integrated into treatment of related languages

Overview of Issues & Sources in Mixtec Etymology

- Sense based changes (*metaphor, metonymy, grammaticalization*) identified in related Mixtec languages important for cognitive linguistics (Brugman, 1983; Beckman, 1995;...)
 - *especially body-part terms*

Sources

- Reconstructed Proto-Mixtecan from Longacker
- Loanwords easily identifiable (mostly from Spanish)
 - *phonological changes evident in these*
- Oldest sources of documentation of Mixtec languages from 1592

Issues, Challenges

- *Need to balance personal/academic/intellectual interests with the practicalities and needs of the language community*
- *Need Mixtec editors to provide Mixtec language versions of content (requires new use of language vocabulary!)*
- Other issues: *one man job*

Overview of Components of Etymological Markup in TEI

Bowers & Romary (2016) propose expansion and refinement of etymology section of the TEI dictionary

TEI Lex0 Etym (Bowers & al., 2018) builds off this.....

- Etymology element (<etym>): structuring etymology processes through typing and recursivity
- Typology of etymological processes
- Etymons and their forms
- Related forms (cognates, and others)
- Temporality of etymological processes
- Bibliographical references in etymologies
- Prose description of etymological process and content

Etymological Features: Cognates

*Related forms extracted
(manually) from academic
papers on other Mixtec varieties*

    <seg type="desc" resp="#JB" xml:lang="en">The motivating source of the metaphor is
the similarity in shape and color between the source concept 'bean' and the target object 'kidney'. The
directionality of 'bean' → 'kidney' is assumed based on the fact that the later is a basic food staple of
Mixtec people and that according to the theory of embodiment, we would expect polysemy to proliferate
in the direction of: more basic/prominent → less basic/prominent. While body parts are amongst the
most prominent in creating polysemies and new terms, the kidney is an internal organ and thus it is likely
a less prominent concept in the embodied experience of the early Mixtecan speakers whose usage gave
rise to this lexicalization.</seg>

Conclusion

- Creating etymological resources in TEI for an indigenous language is challenging given limited sources, the need to balance the perspectives and target audiences, e.g. linguistic (academic), technological, and especially language community
- Encoding etymology for a Mixtec language required and inspired the expansion of the features of TEI dealing with etymology
- Need to further be able to systematically extract and integrate cognate and (very limited) historical and reconstructed Proto-Mixtecan data
- Doing the above in TEI can hopefully provide an extensible set of data for other project in related languages to make use of and add to the resources created in this project
